

PAPER MODELS™:
The Christmas Kit™
Reference Card Update

For the Apple® II GS computer

This *Reference Card Update* lists all the decoration patterns contained on your *Paper Models: The Christmas Kit* disk. All the patterns are in separate files, contained in folders, which you'll work on with *Paintworks Plus*™.

Follow the instructions in your *Paintworks Plus Artist's Guide* for loading *Paintworks Plus* into your computer, then insert your *Paper Models: The Christmas Kit* disk in your disk drive (in your second disk drive if you have two). Open the *Paper Models: The Christmas Kit* disk as you would any other disk—by pointing and clicking. Open the **Activision** folder to view the title screen.

To start creating your holiday decorations, follow the instructions in *The Christmas Kit Decorator's Guide* for Macintosh™ computers and your *Paintworks Plus Artist's Guide*. Make sure that you have a work disk at hand for saving your new Christmas decoration files.

You'll find that the patterns in *The Christmas Kit* files are already decorated with Christmas art. If you want to redecorate a pattern with art of your own making or with holiday images from the **Art** folder, simply erase the art that's already there before proceeding. With any completely enclosed area in a pattern, one quick way to do this is to use the *Paintworks Plus* **Paint Bucket** to fill the area with white or any other color. Then you can paint or place new art of your own choosing in the area.

What's on the Disk

The following is a list of all the folders and files on your *Paper Models: The Christmas Kit* disk, coupled with exactly which pieces you'll find in each file. Use this list with the *Paintworks Plus* **Open** command to load files into your computer.
