

About Your 3.5 Inch Apple Disks

The 3.5 inch disks you have received were created using *AmDOS 3.5*, copyright 1985-1988 by Gary B. Little, and licensed to Focus Media, Inc. by Mr. Little.

Using Your 3.5 Inch Disks

When double-sided 5.25 inch disks that have been converted to 3.5 inch disks are run, you may occasionally encounter a disk-turn message. A disk-turn message tells you to remove from the disk drive the disk currently in use, turn it over, and replace it in the drive. However, since 3.5 inch disks cannot be inserted in a drive upside down, this message may appear somewhat out of place. If you do encounter this message while using a 3.5 inch disk simply replace the current disk with its side counterpart. For example, if you encounter such a message and the 3.5 inch disk currently in the drive is labeled "Side A" you should replace it with the 3.5 inch disk marked "Side B." Conversely, if "Side B" is the current disk then you should replace it with "Side A." You may also see similar messages using "Side 1" and "Side 2."

Sometimes a program will prompt you to insert a different disk. These messages should be treated the same way.
