

## **Addenda for release 2.0 of KALEIDOKUBES FOR THE APPLE IIGS**

The latest release of KALEIDOKUBES contains several new features to further enhance the program. You can now create, load, and save your own game boards, and there is also a high score screen.

### **CREATING YOUR OWN GAMEBOARD:**

- To create your own board, pick CREATE BOARD under the OPTIONS MENU.
- The computer will clear the board and draw a grid pattern on the screen.
- Click the mouse button to place a Kube onto the board; click the button on a kube to remove it from the board.
- To exit the editor, press the [escape] key. The computer will redraw your board, making any unused Kubes blank.
- At this time, you can either play your new board, or you can save it to disk. The boards must be saved under the sub-directory BOARDS.
- To save a board, pick SAVE BOARD. The computer will display a dialog box. Click OPEN the BOARDS sub-directory and type the name of your board. Click SAVE to save your new board to disk.
- To load a board, pick LOAD BOARD. The computer will display a dialog box. Click OPEN the BOARDS sub-directory and click on the board you wish to play.

### **FILES MENU:**

- To view current HIGH SCORES, pick VIEW HIGH SCORES. The computer will clear the screen and display the HIGH SCORE screen. To exit, just click the mouse button.
